

The benefits of eLearning are:

- Training is always available, 24 X 7
- Reach staff in different locations (no travel or accommodation costs)
- Flexibility, >80% of households have at least one computer
- Training fits around work commitments, not vice versa
- Caters to the availability of staff (no lost training days)
- Not reliant on trainer availability (or expenses)
- Uniform training delivery, ensures quality learning
- Best medium to accommodate different learning styles
- Every participant is individually tested on key topic criteria
- Learning planned to suit individual needs and work roles
- Competency development through on-the-job components
- Integrate training programs with career planning
- Multiple forms of assistance with rail or course issues
- Web-based registration, tracking and reporting
- Detailed, on-line records automatically generated
- Participants and managers can track progress and performance
- Independent assessment, testing and survey capabilities
- Certification, regulatory compliance and administration tracking
- Slash cost of induction, site and other repetitive training

With our services you can:

- Put any of your courses on-line — we'll securely host them for you
- Present our courses (in your company livery) to your clients
- Use our courses to free up scarce trainers for skills development
- Simplify your assessing, compliance or certification requirements
- Use our expertise to help solve your training issue
- Link training investments and their impact to the strategic bottom line

The track to success
